Summary

Tech Lead and Full Stack Developer with over 6 years of experience leading the modernization of critical enterprise systems. Specialist in the **Angular ecosystem (12-21)** and serverless architectures, with a proven track record of maintaining **99.8% availability** and performance optimization (**Lighthouse 96-98+**). Expert in integrating **AI agents** and Large Language Models (LLMs) to automate technical workflows and optimize productivity. Focused on measurable impact (**ROI/KPIs**), reducing delivery cycles by **40%** through agile methodologies and technical mentorship.

Experience

Legal Counsel of the Government of the State of Campeche, Tech Lead | Full Stack Developer – Campeche, Mexico Aug 2019 – present

- Technically led the development of 4 critical systems, coordinating a junior developer team and achieving a savings of **~120 monthly hours** of operational labor for 50+ users.
- Reduced delivery cycles by **40%** through the implementation of Scrum methodology with 2-week sprints and technical ceremony facilitation.
- Guaranteed **99.8% production uptime** and **sub-300ms response times** in REST APIs developed with Node.js and MongoDB.
- Redesigned frontend architecture using **Angular (12-21)**, implementing Signals and Standalone Components, which reduced runtime errors by 40%.
- Optimized technical SEO and official portal performance (**Lighthouse 96-98+**), achieving a **32% increase in organic traffic** within 6 months.

Independent Technical Consultant (Freelance), Senior Software Consultant & Technical SEO Lead – Remote / Campeche, MX Jan 2020 – present

- Providing software architecture and performance optimization solutions for diverse clients, specializing in migrating legacy applications to modern frameworks (Angular 19-21) and serverless architectures.
- Executed a technical SEO and performance audit for **Canavati Seguros**, identifying 12 critical issues and improving Core Web Vitals (LCP, CLS) by 25% through asset optimization and CSS refactoring.
- Designed and implemented organic growth strategies resulting in a **25% CTR increase** for key landing pages in less than 60 days.
- Complete lifecycle management of independent projects, from quoting and requirements definition to final deployment in cloud environments (Vercel/Firebase), ensuring superior technical quality.

Projects

Venta Simple - Multi-tenant SaaS Platform – miventasimple.com Mar 2026 – present

- Designed and architected a high-performance **Multi-tenant SaaS platform** supporting diverse business archetypes, implementing a dynamic theme system ("Midnight Command Center") and **Angular 21 + MongoDB 8** architecture.
- Developed an **advanced loyalty engine** and automated point campaign management, allowing businesses to retain customers through integrated digital marketing strategies.
- Implemented an **inventory module with recipe management** and per-item costing, ensuring accuracy in automatic stock deductions during sales and reducing operational shrinkage.
- Integrated payment gateways with **Mercado Pago** and a tiered subscription system (Plans) with feature validation and usage limits middleware.
- *Note: This project is the technological evolution of KashFlow POS (currently deprecated/outdated), migrating towards a more scalable and modern architecture.*

CJ Document Management System – Legal Counsel, CampecheFeb 2023 – present

- Architected an enterprise system for the workflow of 7,000 annual official documents, integrating Windows Server infrastructure and automating consecutive folio assignment.
- Optimized backend performance with strategic indexing in MongoDB, achieving 400ms response times on complex queries for over 70 concurrent users.

AzotoDev - Technical Blog & SEO Showcase – azotodev.comDec 2024 – present

- Developed a technical blog using Angular 21 and Signals, achieving a 100/100 SEO Score and perfect Lighthouse performance through advanced Web Vitals techniques.
- Implemented full PWA support for offline reading of technical articles dynamically rendered from Markdown.

Education

B.S. Universidad Mundo Maya (UMMA), B.S. in Computer Systems Engineering – Sept 2015 – Dec 2019
Campeche, Mexico

- Solid foundation in systems architecture, advanced algorithms, data structures, and relational database management.
- Capstone Project: Design and development of a web-based academic management system using PHP, MySQL, and Bootstrap.

certifications & continuous learning

Online Specialization (Udemy, Angular.dev, MongoDB University), Modern Web Architecture & AI IntegrationJan 2020 – present

- Specialization in Angular Core Deep Dive, RxJS, and state management with NgRx (Angular University).
- Self-directed learning focused on AI Agent integration, Large Language Models (LLMs), and Serverless architectures for high-availability applications.
- Ongoing technical certifications from MongoDB University and official Node.js documentation.

Skills

Frontend Development (Expert): Angular (12–21), TypeScript, Tailwind CSS 4, RxJS, Signals, Standalone Components, PWA (Offline-first), Material Design

Backend & Infrastructure: Node.js (22), Express, MongoDB (8.0 + Atlas), Firebase Admin, RESTful APIs, JWT, Middleware Architecture, Serverless (Vercel)

Performance & SEO (Advanced): Web Vitals Optimization (Lighthouse 96-98+), Technical SEO, Schema.org, Google Search Console, GA4/GTM, WCAG 2.1 AA

AI & Emerging Tech: AI Agent Orchestration, LLM Integration (OpenAI/Gemini), Prompt Engineering for Devs, Modern Web Standards

DevOps & Tools: Git/GitHub, CI/CD (GitHub Actions), PM2, Windows Server/IIS Integration, Docker (Basic), PostCSS

Professional Competencies: Technical Leadership (Small Teams), Mentorship, Scrum Master (2-week sprints), ROI/KPI-driven Development

Languages: Spanish (Native), English (Mid/Advanced)
